	Environmental Management System					
1	Do you have an environmental management system implemented and maintained across the scope of work you provide to us?	3				
2	Is your environmental management system certified to ISO 14001:2026 (or a recognized equivalent)? If yes, please email or fax an uncontrolled copy of your certificate with this questionnaire.	3				
3	Do you have a documented environmental policy signed by top management? If yes, please email or fax an uncontrolled copy of your policy with this questionnaire.	3				
4	Does the environmental policy include commitments to protection of the environment, prevention of pollution, fulfilment of compliance obligations, and continual improvement?	2				
5	Is the environmental policy communicated to all workers and contractors under your operational control, and made available to relevant interested parties?	3				
6	Is the scope of your environmental management system clearly documented, including the activities, products, services, sites, and operational boundaries covered?	3				
7	Have top management taken accountability for the effectiveness of the environmental management system, with defined roles, responsibilities, and authorities assigned and communicated?	3				
8	Have you determined the external and internal issues relevant to your environmental management system, including climate-related physical and transition risks where applicable?	2				
9	Have you identified the interested parties relevant to your environmental management system (regulators, customers, community, suppliers, workers) and their needs and expectations?	3				
10	Do you have a dedicated environmental manager or equivalent role with competence and authority to run the environmental management system day-to-day?	3
