Contents

Contents *1*

1 Corrective Action & Problem-solving *3*

1.1 Using the Corrective Action Tracker **3**
1.1.1 Part A – Problem Definition 3
1.1.2 Part B – Corrective Action Plan 4
1.1.3 Corrective Action Charts 4
1.1.4 Input Messages 5
1.1.5 Using the drop-down menus 5

1.2 Identify the Problem **5**

1.3 Define the Problem **6**
1.3.1 Generate a Problem Description 6
1.3.2 Establish a Response Team 7
1.3.3 Comparative Analysis 7
1.3.4 Communication 8

1.4 Contain the Problem **8**
1.4.1 Immediate Containment Action 8
1.4.2 Interim Containment Action 9
1.4.3 Verify Containment Action 9

1.5 Analyze the Causes **10**
1.5.1 Root-cause Analysis Tools 10
1.5.2 Using the A3 Action Plan 11
1.5.3 Using the 5-Whys Analysis Process 12
1.5.3.1 Essential Elements of the 5-Whys 12
1.5.3.2 How to Use the 5-Whys 13
1.5.3.3 Mastering the 5-Whys 13
1.5.3.4 Validate Findings 16
1.5.4 Using the 8D Analysis Process 16
1.5.4.1 D0: Prepare for Problem-solving 16
1.5.4.2 D1: Establish a Team 17
1.5.4.3 D2: Problem Description 17
1.5.4.4 D3: Interim Containment Actions 17
1.5.4.5 D4: Diagnose Root-cause 18
1.5.4.6 D5: Identify Solutions (Planned PCA) 18
1.5.4.7 D6: Implement, Verify & Validate Corrective Actions (Actual PCA) 19
1.5.4.8 D7: Prevention 19
1.5.4.9 D8: Congratulate Your Team 19
1.5.5 Verify the Root-cause(s) 19
1.5.5.1 Immediate Causes 20
1.5.5.2 Contributing Causes 20
1.5.5.3 Peripheral Causes 20
1.5.5.4 Systemic Causes 21
1.5.6 Determine Escape Point & Implement Controls 21

Corrective Action Guidance

ISO 14001:2026 & 45001:2018

1.6 Implement Corrective Action....22
1.6.1 Implement Permanent Corrective Action....22
1.6.2 Update Documentation....22
1.6.3 Prevent Recurrence....22
1.7 Monitor Corrective Action....23
1.7.1 Review Process....23
1.7.2 Ineffective Corrective Actions....24
1.7.3 Knowledge & Learning....24
1.7.4 Implementing Actions Elsewhere....25
1.7.5 Management Review....25
1.8 Root-cause Analysis Process....26

1 Corrective Action & Problem-solving

Clause 10.2 of ISO 14001:2026 (Nonconformity and corrective action) and ISO 45001:2018 (Incident, nonconformity and corrective action) sets out what must happen when a nonconformity or incident occurs; this guidance document provides a 6-step methodology for meeting the requirements of these clauses. These clauses state the requirements for the occurrence of a nonconformity and include actions to prevent similar problems from occurring.

Your organization must take whatever action is necessary to control and correct the nonconformity and to deal with any resulting impact by determining what caused the nonconformity and considering whether the potential for a similar problem remains.

This is done by considering whether any further action is required to prevent a similar nonconformity from arising at the same place or somewhere else in the future and determining if similar nonconformities have occurred elsewhere; and whether it needs to take similar corrective action.

Root-cause Analysis Process

Taking appropriate action to address the effects of the problem may require a simple correction by the process owner or operator where it was discovered, or if a major failure or defect exists, more significant levels of resources would be needed for problem-solving and corrective action.

There may be instances where it is impossible to completely eliminate the cause of the nonconformity, so in these instances, the best you can do is to reduce the likelihood or the consequences of a similar problem happening again to minimize the risk to an acceptable level.

Any nonconformities and subsequent actions to prevent their reoccurrence and the effectiveness of the corrective action(s) should be documented and retained. Therefore, consideration should be given to developing and using the *Corrective Action Tracker* to capture this information.

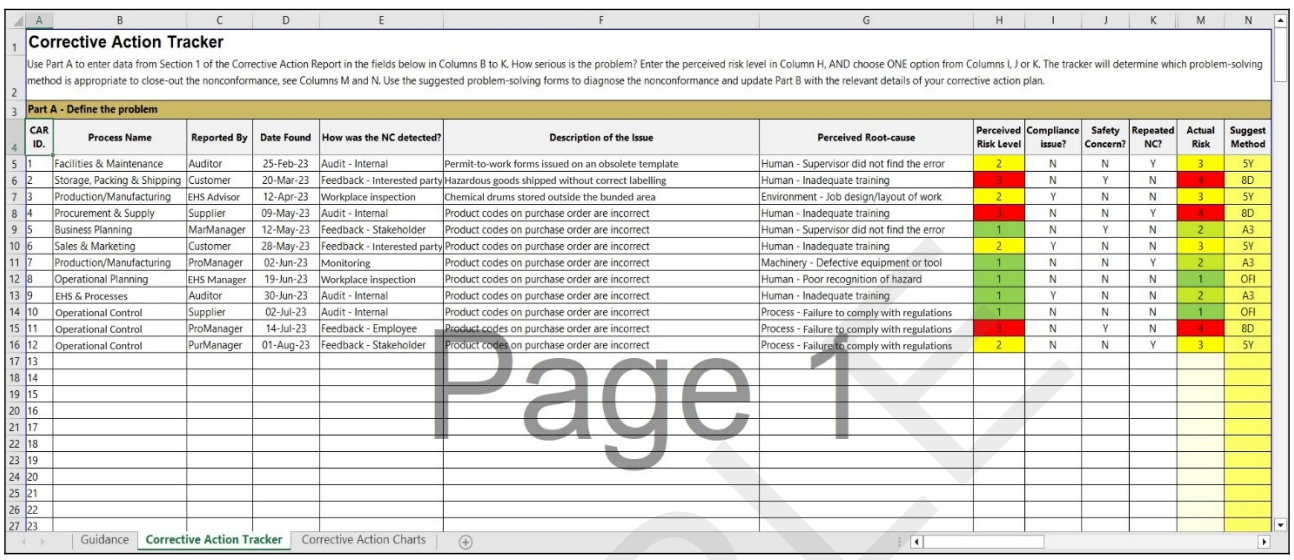

1.1 Using the Corrective Action Tracker

1.1.1 Part A – Problem Definition

- Enter the Data from the Corrective Action Report;
- Capture the data from the corrective action report in Part A to determine the most suitable problem-solving method to address the causes of the nonconformance;
- From the corrective action report, enter the details from Section 1 into the related fields in the tracker;
- Based upon judgment and experience, categorize the perceived risk level of the problem using the drop-down menu in Column H;
- Classify the problem by choosing ONE option from either Column I, Column J or Column K;
- Entering in Y's or N's results in a risk score that ranges from 1 to 4;

SAMPLE

- Column M will calculate an overall risk score based on the data previously entered;
- The suggested problem-solving method shown in Column N is based on the following trigger scores 1 = OFI, 2 = A3 (Who, What, When action plan), 3 = 5Y (5-Whys cause analysis) and 4 = 8-Disciplines (In-depth analysis).

Corrective Action Tracker

Use Part A to enter data from Section 1 of the Corrective Action Report in the fields below in Columns B to K. How serious is the problem? Enter the perceived risk level in Column H, AND choose ONE option from Columns I, J or K. The tracker will determine which problem-solving method is appropriate to close-out the nonconformance, see Columns M and N. Use the suggested problem-solving forms to diagnose the nonconformance and update Part B with the relevant details of your corrective action plan.

Part A - Define the problem

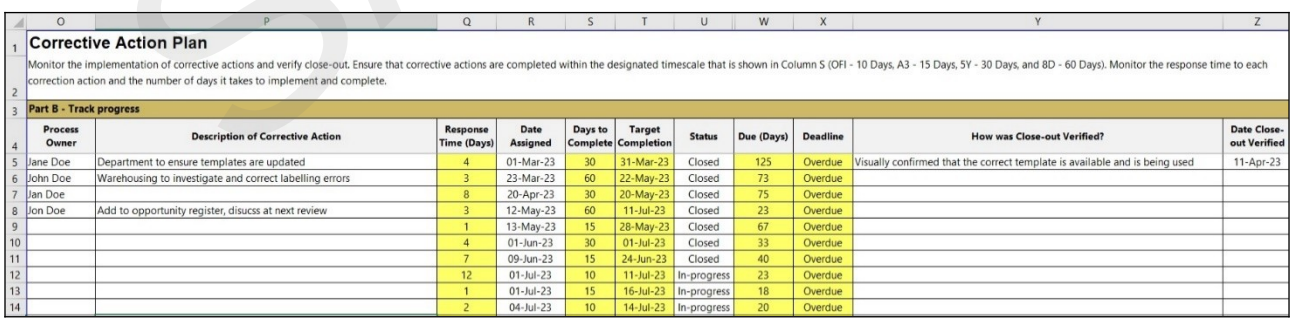

CAR ID.	Process Name	Reported By	Date Found	How was the NC detected?	Description of the Issue	Perceived Root-cause	Perceived Risk Level	Compliance issue?	Safety Concern?	Repeated NC?	Actual Risk	Suggest Method
1	Facilities & Maintenance	Auditor	25-Feb-23	Audit - Internal	Permit-to-work forms issued on an obsolete template	Human - Supervisor did not find the error	2	N	N	Y	3	5Y
2	Storage, Packing & Shipping	Customer	20-Mar-23	Feedback - Interested party	Hazardous goods shipped without correct labelling	Human - Inadequate training	3	N	Y	N	4	8D
3	Production/Manufacturing	EHS Advisor	12-Apr-23	Workplace inspection	Chemical drums stored outside the bunded area	Environment - Job design/layout of work	2	Y	N	N	3	5Y
4	Procurement & Supply	Supplier	09-May-23	Audit - Internal	Product codes on purchase order are incorrect	Human - Inadequate training	3	N	N	Y	4	8D
5	Business Planning	MarManager	12-May-23	Feedback - Stakeholder	Product codes on purchase order are incorrect	Human - Supervisor did not find the error	1	N	Y	N	2	A3
6	Sales & Marketing	Customer	28-May-23	Feedback - Interested party	Product codes on purchase order are incorrect	Human - Inadequate training	2	Y	N	N	3	5Y
7	Production/Manufacturing	ProManager	02-Jun-23	Monitoring	Product codes on purchase order are incorrect	Machinery - Defective equipment or tool	1	N	N	Y	2	A3
8	Operational Planning	EHS Manager	19-Jun-23	Workplace inspection	Product codes on purchase order are incorrect	Human - Poor recognition of hazard	1	N	N	N	1	OFI
9	EHS & Processes	Auditor	30-Jun-23	Audit - Internal	Product codes on purchase order are incorrect	Human - Inadequate training	1	Y	N	N	2	A3
10	Operational Control	Supplier	02-Jul-23	Audit - Internal	Product codes on purchase order are incorrect	Process - Failure to comply with regulations	1	N	N	N	1	OFI
11	Operational Control	ProManager	14-Jul-23	Feedback - Employee	Product codes on purchase order are incorrect	Process - Failure to comply with regulations	3	N	Y	N	4	8D
12	Operational Control	PurManager	01-Aug-23	Feedback - Stakeholder	Product codes on purchase order are incorrect	Process - Failure to comply with regulations	2	N	N	Y	3	5Y

Guidance | Corrective Action Tracker | Corrective Action Charts

Page 1

1.1.2 Part B – Corrective Action Plan

- Undertake root-cause analysis;
- Issue the chosen root-cause analysis method to the process owner/response team for completion;
- Once completed, update the root-cause in Part A;
- Update the 'Corrective Action Plan' in Part B;
- Monitor the implementation of corrective actions and verify close-out;
- The status of the corrective action will remain 'Open' until such time as work to correct the nonconformance begins, then the status becomes 'In-Progress',
- This means the status stays 'In-Progress' until the associated corrective action is verified. The status of the nonconformance would then change to 'Closed',
- Should the corrective action request be withdrawn, the status is set to 'Cancelled'.

Corrective Action Plan

Monitor the implementation of corrective actions and verify close-out. Ensure that corrective actions are completed within the designated timescale that is shown in Column S (OFI - 10 Days, A3 - 15 Days, 5Y - 30 Days, and 8D - 60 Days). Monitor the response time to each correction action and the number of days it takes to implement and complete.

Part B - Track progress

Process Owner	Description of Corrective Action	Response Time (Days)	Date Assigned	Days to Complete	Target Completion	Status	Due (Days)	Deadline	How was Close-out Verified?	Date Close-out Verified
Jane Doe	Department to ensure templates are updated	4	01-Mar-23	30	31-Mar-23	Closed	125	Overdue	Visually confirmed that the correct template is available and is being used	11-Apr-23
John Doe	Warehousing to investigate and correct labelling errors	3	23-Mar-23	60	22-May-23	Closed	73	Overdue		
Jan Doe		8	20-Apr-23	30	20-May-23	Closed	75	Overdue		
Jon Doe	Add to opportunity register, disucss at next review	3	12-May-23	60	11-Jul-23	Closed	23	Overdue		
		1	13-May-23	15	28-May-23	Closed	67	Overdue		
		4	01-Jun-23	30	01-Jul-23	Closed	33	Overdue		
		7	09-Jun-23	15	24-Jun-23	Closed	40	Overdue		
		12	01-Jul-23	10	11-Jul-23	In-progress	23	Overdue		
		1	01-Jul-23	15	16-Jul-23	In-progress	18	Overdue		
		2	04-Jul-23	10	14-Jul-23	In-progress	20	Overdue		

1.1.3 Corrective Action Charts

The charts in the 'Corrective Action Charts' tab will automatically update based on the database in Columns AB through to AR in the 'Corrective Action Tracker' tab. To locate the data for each chart, right-click the chart and click 'Select Data' from the menu.

This will open the tracker tab and highlight the source data and allow you manually adjust the data range that each chart displays.
